Mr. Michael Hotka
1425 Snowberry Lane
Broomfield, Colorado 80020

Dear Mr. Hota,

Thank you for taking time to write to CDOT regarding issues you are having while driving on the Boulder Turnpike. CDOT will need to investigate and research the use of the plastic vanes atop of the concrete barrier. CDOT has installed these devices at other locations in the state and I will be contacting persons in those areas as part of my research.

My research will include cost of the item, installation cost and maintenance cost. I will also look into accident history as well as contacting CDOT personnel where the devices are operating currently. Please understand this will take some time to acquire all the information in order to respond to your request.

Please feel free to contact me if you would like to discuss your request further.

Sincerely,

Larry J. Haas PE
Traffic Operations Engineer
Colorado Department of Transportation
